

FLOORING PRODUCTS

PATENTED POLYASPARTIC COATINGS

SPARTACOTE® FLEX SB™

72% solids, two-component, polyaspartic coating. Highly durable UV resistant finish.

- 1:1 mix ratio, rapid installation and next-day return to service
- Superior chemical resistance with low-temperature cure
- Available in a clear gloss, low gloss and pigment base form

SPARTACOTE FLEX XT™

92% solids, two-component, polyaspartic coating. Widely used within heavy-duty environments requiring minimal downtime.

- 1:1 mix ratio with significant durability and increased film thickness
- UV stable with superior chemical resistance
- Low VOC formulation is available in clear and pigment base forms

SPARTACOTE FLEX PURE™

High solids, two-component, polyaspartic coating with minimal odor (no solvent smell). Ideal for indoor applications requiring rapid return to service with low-odor installation.

- Excellent working time for high solids polyaspartic
- 1:1 mix ratio formula is LEED compliant
- Available in clear and pigment base forms

EPOXY COATINGS AND MOISTURE CONTROL

SPARTACOTE WB EPOXY PRIMER™

Rapid-cure, two-component, water-based epoxy primer. Provides for superior substrate adhesion.

- 3:2 (A:B) mix ratio
- Ideal for indoor applications
- Available in sand beige, light grey, black and clear

SPARTACOTE SURFACE BUILD 110™

Professional grade, 100% solids, self-leveling epoxy. Use in conjunction with SPARTACOTE® polyaspartic top-coats.

- 1:1 mix ratio
- Excellent adhesion with self-leveling finish
- Available in tan, grey and clear

SPARTACOTE SURFACE BUILD 150™

High quality 100% solids self-leveling epoxy. Primarily used as a build coat with various high performance SPARTACOTE resinous flooring systems.

- 2:1 (A:B) mix ratio
- Use as a stand-alone or with aggregate for added build
- Available in clear only

DRYTEK™ MOISTURE VAPOR BARRIER

Single-coat, 100% solids, liquid applied 2-part epoxy coating specifically designed for controlling the moisture vapor emission rate. Compatible with any SPARTACOTE floor coating system.

- May be used over damp concrete or new/green concrete that is only 5-days old
- Exceeds ASTM F3010 at 12 mil thickness

CONCRETE REPAIR AND JOINT FILLER

SPARTACOTE FAST FIX™

Rapid set dual-component concrete repair material. Apply neat or with aggregate to create a high strength permanent concrete repair.

- Rigid in 15 minutes
- Excellent abrasion resistance

SPARTACOTE POLYASPARTIC PIGMENTS™

Specially engineered reactive resin based pigments designed to be used with SPARTACOTE FLEX SB™, SPARTACOTE FLEX XT™ and SPARTACOTE FLEX PURE™ polyaspartic coatings. Dispersed onsite for optimal performance.

- Available in 14 colors, including safety colors
- Superior hide and color retention
- Available in small 1 qt (0.9 L) and large 1.25 gal (4.7 L) format units

CHIP MEDIA AND AGGREGATES

VINYL AND MICA CHIP MEDIA

Decorative vinyl or mica chips used in various flooring systems to create a terrazzo-like appearance.

- Numerous colors and blends offer customized finish
- Provide added traction, thickness and durability
- MICA chips offer brilliant reflectivity

COLORED QUARTZ AGGREGATES

Highly durable colored quartz aggregates for use in a variety of SPARTACOTE flooring systems.

- UV stable, suitable for interior or exterior use
- Optimal for situations requiring a durable and textured surface

SPARTACOTE GRIP™ TRACTION ADDITIVE

Ultra-tough yet lightweight resin based traction additive designed to be dispersed into SPARTACOTE FLEX SB, SPARTACOTE FLEX XT and SPARTACOTE FLEX PURE top-coats.

- Ultra-lightweight suspended additive increases abrasion resistance
- Available in 40, 60 and 100 mesh

SPARTACOTE DIAMOND TOPP™ WEAR COAT ADDITIVE

A specialized additive for use in extreme heavy-traffic situations during the top coating phase of a project.

- May be incorporated into a top-coat over any SPARTACOTE system; provides for a lightly textured matte finish

DECORATIVE CONCRETE

SPARTACOTE VIVID DYE™

High quality liquid dispersed concrete dye. Formulated to be applied directly to prepared concrete and then coated with SPARTACOTE FLEX clear top-coats.

- 15 intense colors that can be applied alone or in conjunction with one-another for a unique application

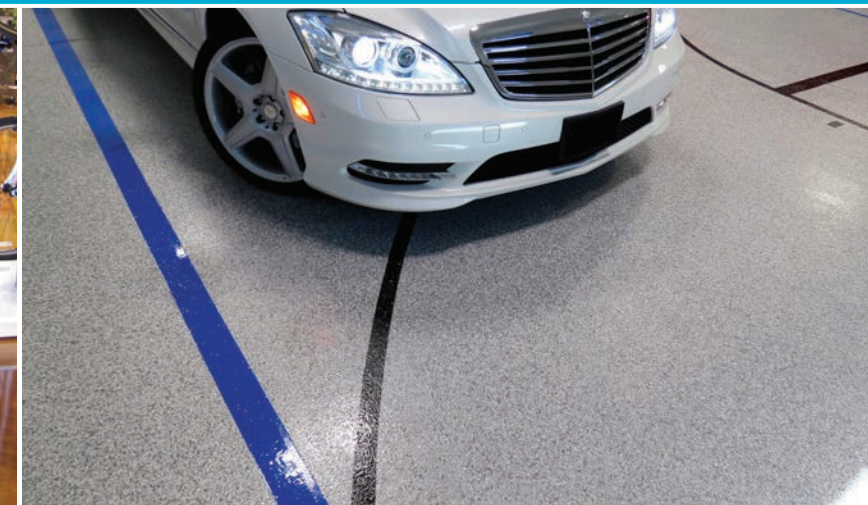

SPARTACOTE METALLIC PIGMENTS™

Synthetically produced metallic pigment additive for SPARTACOTE Surface Build Epoxy and SPARTACOTE polyaspartic coating materials.

- Used in decorative metallic flooring systems
- Provides incredible color brilliance and depth

COMMERCIAL AND INDUSTRIAL RESINOUS FLOORING

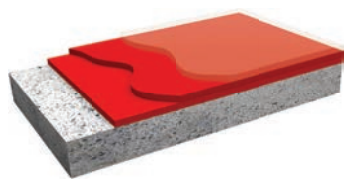

SPARTACOTE® Coating Systems

SPARTACOTE® coating systems offers a full line of patented DUAL-CURE® polyaspartic coatings for concrete. Our high performance commercial and industrial flooring systems provide owners with superb concrete protection and longevity in even the most demanding heavy-traffic situations. Specifiers and designers may select from a multitude of colors, blends and finishes to create customized resinous flooring solutions to compliment any environment.

- One-day installation and next-day return to service
- Superior chemical and stain resistance
- UV stable and non-yellowing
- Low VOC and low odor applications
- Outstanding adhesion
- High durability
- Interior or exterior use
- Low temperature cure
- No hot-fire pickup

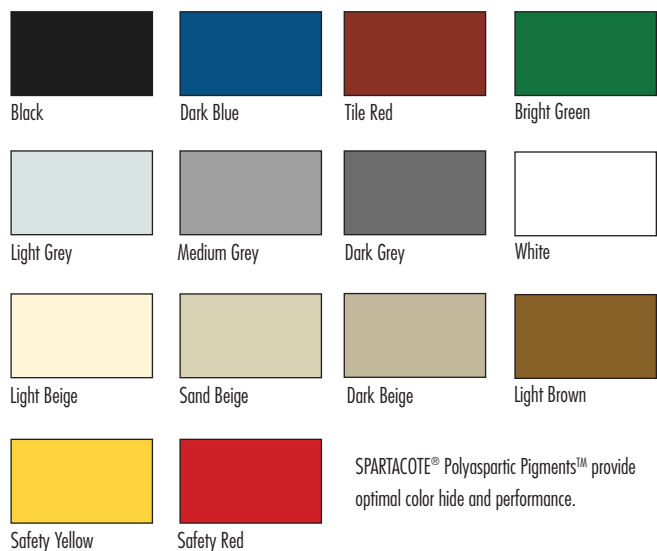

SPARTACOTE GUARD™ Solid Color Coatings

Superior resistance to punishing industrial traffic, Skydrol® and other harsh chemicals. Popular where cleanliness is a must. A logical choice for demanding environments such as aviation hangers, manufacturing and shop floors.

SPARTACOTE® GUARD™

SPARTACOTE GUARD PURE™
Low VOC/Low Odor

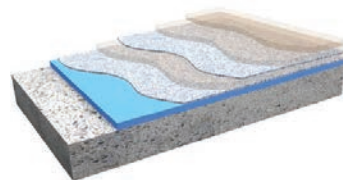

QUARTZ AND VINYL CHIP SEAMLESS FLOORING

SPARTACOTE QUARTZ™ Quartz Flooring

Highly-durable colored quartz aggregates are layered between SPARTACOTE FLEX™ coatings to create an attractively textured floor. Ideal for parking decks, stadiums and commercial kitchens.

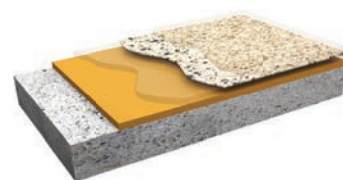

SPARTACOTE QUARTZ™

SPARTACOTE QUARTZ PURE™
Low VOC/Low Odor

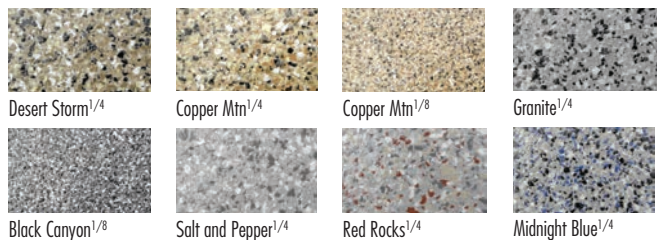

SPARTACOTE CHIP™ Seamless Flooring

A unique terrazzo-like finish that provides owners with reduced maintenance and long-term durability. Popular in retail locations, schools and high-end residential garages.

SPARTACOTE CHIP™

SPARTACOTE CHIP PURE™
Low VOC/Low Odor

BLENDED MICA CHIP™ Seamless Flooring

Decorative MICA-based chips used in various flooring systems to offer a terrazzo-like appearance.

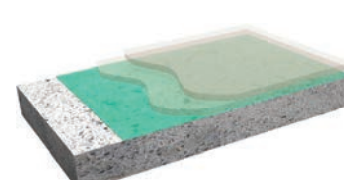

DECORATIVE CONCRETE

SPARTACOTE STAIN™ Decorative Flooring

Incorporates liquid dispersed concrete dyes with SPARTACOTE FLEX clear sealers for a highly artistic yet durable surface. Often considered an alternative to polished concrete in situations requiring superior chemical and stain resistance.

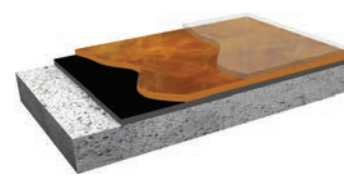

SPARTACOTE STAIN™

SPARTACOTE STAIN PURE™
Low VOC/Low Odor

SPARTACOTE METALLIC™ Metallic Flooring

SPARTACOTE METALLIC™ uses synthetically produced aluminum platelets coated with metal oxides to produce beautiful color intensity and luster. Designed to be added directly into SPARTACOTE FLEX SB™ and SPARTACOTE Epoxy Surface Build coatings, these materials may be applied using a variety of methods depending on the desired final appearance.

SPARTACOTE METALLIC™

SPARTACOTE METALLIC PURE™
Low VOC/Low Odor
